

CAMEROON UNIVERSITIES/EDUCATIONAL INSTITUTIONS

1) IN CAMEROON

I can regenerate it with institution name, town, and full website address. However, I should not invent website URLs: many institutions in the MINESUP directory either have no publicly verified website or use changing domains. I'll therefore distinguish between verified official websites and "website not verified" rather than supplying false links.

Cameroon higher-education institutions: towns and website links

Note: Cameroon's Ministry of Higher Education lists approximately 430 authorized private higher-education institutions, so many smaller institutes do not have a consistently verifiable official website. I have included a full link where an official website is reasonably identifiable. Where no reliable institutional website could be confirmed, I have provided the official MINESUP directory link instead.
